

Rationale:
Find the physical hazards in these images.

1. List 5 physical hazards in these images:
2. Describe the corrective action(s), for each hazard.
3. Why does the sink have 3 sections to it? How are each section used?

Scenario

Jonny was preparing the sinks in the kitchen during a busy time of service. While prepping the final sink, he splashed bleach in his eyes.

1. What steps are to be taken when this occurs?
2. What product can be used to stop the burning?
3. Should this accident be written up? Why?

Kate is a Sous Chef, she was preparing for a large banquet. Kate accidentally sliced the top of her finger.

1. What precautionary measures are to be followed based on the health and safety aspect of the injured party and the clean up stages?
- b, What chemicals are used to clean up the blood spill?
