

How to Read a Material Safety Data Sheet (MSDS) – Youtube Power Point

1. What three main categories of information does an MSDS contain?

2. Where are MSDS sheets generally intended to be used?

- a. Within the home.
- b. Within occupational settings
- c. At sporting events
- d. Within the process of gardening.

3. What four of these factors listed

- I. Health
- II. Properties
- III. Reactivity
- IV. Physical Data
- V. Flammability
- VI. Protective Equipment

are indicated within an MSDS label?

- a. I, II, III, and IV
- b. I, III, IV, and V
- c. I, III, V, and VI
- d. II, III, V, and VI

4. The number “1” on an MSDS label would indicate

- a. Severe hazard
- b. Serious hazard
- c. Moderate hazard
- d. Slight hazard
- e. Minimal Hazard

5. The number “4” on an MSDS label would indicate

- a. Severe hazard
- b. Serious hazard
- c. Moderate hazard
- d. Slight hazard
- e. Minimal Hazard

6. Why is “Fire and Explosion Hazard Data” important to have on an MSDS sheet?

- a. Because all hazardous chemicals present a risk for fire and explosion.
- b. Because all chemical fires and explosions should be handled in the same way.
- c. Because most chemicals will go through reactions in a similar way and present similar risk for fire and explosion which should all be handled in the same way.
- d. Because different chemicals react in different ways and present different risks for fire and explosion which need to be handled in different ways.
